

## Construction: Built Environment (Level 6)

Glasgow Clyde College

### Venues

Cardonald Campus

### Content

The construction industry needs more than just traditional trades, it requires well-trained and qualified people as managers, technologists and technicians.

This NC Construction: Built Environment Level 6 course is designed to equip you with the knowledge, skills and understanding required for employment in a dynamic construction industry. There are so many aspects to construction for the appropriately trained, including organising resources, materials, labour, planning and monitoring construction quality and progress.

This course allows you to work in the construction industry without following a traditional apprenticeship route, but can also enhance the opportunity for you to be taken on as an apprentice.

Content:

Construction Technology: Modern methods of construction; Health and Safety; Construction materials;  
Construction site surveying: an introduction; Building Environment Project.

### Start Date

August

### Qualification

NC
