

Systems Thinking in Practice

Open University in Scotland

Content

This MSc has the development of skills in holistic thinking, and appreciation of multiple perspectives at its core. These skills are relevant to many different domains: e.g. health, business, local government, environment, development, engineering, organisation change and IT management. You'll gain insights into the range of ways in which other people think about particular situations and how to apply a wide range of concepts, tools and techniques developed by systems thinkers. You'll also learn to appreciate and develop your own ways of thinking in practice, becoming aware of how you can act to bring about improvements in messy situations.

On completion of Stage 1 students can exit with a Post Graduate Certificate in Systems Thinking in Practice.

On completion of Stage 2 students can exit with a Post Graduate Diploma in Systems Thinking in Practice.
