

## Engineering

Open University in Scotland

### Content

This MSc allows you to combine modules from engineering analysis and technology to shape a qualification that suits your career aspirations. The course will help you develop a professional approach to your work and extend your engineering skills. You'll also develop a range of transferable skills such as the ability to solve problems creatively, communicate effectively, manage projects and turn concepts into reality.

On completion of Stage 1 students can exit with a Postgraduate Diploma in Engineering.

### Start Date

October

### Qualification

Postgraduate Master's

### Study Method

Distance and Flexible learning

### Award Title

MSc

### Course Length

3.5 years (minimum)

### Faculty

General

### Department

Engineering

### Entry Requirements

For Stage 1, you should normally hold a UK honours degree (or equivalent) in a subject with a high mathematics content. If you don't have an honours degree, you may still be able to study this qualification by demonstrating your ability to study at postgraduate level.

You must study Stage 1 of this MSc course – the Postgraduate Diploma in Engineering (E22) or the Master of Engineering (M04) – before registering on Stage 2 – the Research project (T802).

Computer and internet access necessary.

## SCQF Level

11
