Environmental Studies

Open University in Scotland

Content

Environmental issues are posing multiple challenges to people and ecosystems across the planet. These challenges can only be addressed effectively if the complex connections between the societal (social, political, economic, cultural, and ethical) and the biophysical (geological, physical, ecological) dimensions of environmental issues are taken seriously. This innovative interdisciplinary degree combines the social and natural sciences to help you understand these different dimensions and why their interrelationships matter as we respond to intensifying environmental change.

Start Date

October, February

Qualification

Degree

Study Method

Online learning

Award Title

BA Hons

Course Length

Flexible

Faculty

General

Department

Geography, Environment and Development

Entry Requirements

There are no formal qualifications required to study this degree. Computer and internet access required.

If you're new to study or to the OU, it is recommended that you start with a course at Level 1.

SCQF Level

10

Progression Routes

Environmental studies graduates are found working in public, voluntary and private sector. A degree in environmental studies can lead to employment across the public, private and voluntary sectors. Businesses, public sector organisations and other employers increasingly have to deal with environment-related issues, making this course relevant to a wide range of professions.
