Content

This sector-leading course* helps you develop the skills needed to become a 3D Digital Developer, incorporating live industry-related projects in a range of different 3D animation disciplines.

This course is aimed at creative individuals with an interest in 3D and 2D animation, video games, digital art and architectural visualisation.

You will develop skills in 3D character modelling and animation, environmental modelling, textures and surfacing, special effects, lighting and camera work. You will learn how to develop your presentation skills and how to produce a portfolio of work.

You will be introduced to industry-standard software including 3D Studio Max, Mudbox, Substance Painter, After Effects and Photoshop. The course also incorporates 3D printing and VR Headsets into the learning experience.

During the Year 2 programme you will have an opportunity to participate in Glasgow Caledonian University and the University of the West Coast of Scotland affiliation and transition programmes. You will also have an opportunity to compete at Worldskills UK and continue on with the courses excellent track record.
