Content

If you love playing computer games and want to learn how to make your own, then the NPA Computer Games Development SCQF level 5 course is for you. This course will teach you the basics of game design, media assets and development. You will learn how to use different tools and techniques to create your own games for various platforms and genres. You will also develop your coding skills and computational thinking, which are essential for the computer games industry. By the end of this course, you will have an example of a game designed by you that you can showcase to potential employers or further education providers.
