City Campus

Content

If you're interested in learning about photography then an NQ Photography course is the perfect starting point. It allows you to develop a wide variety of skills in a range of hands-on projects, using studio equipment, working on location and where possible working in our traditional black and white darkroom. You'll be trained to work in a photographic studio set up and develop your creative ideas using a wide variety of digital and film cameras, lighting equipment and specialist kit under the supervision of experienced and friendly lecturers.

You'll learn, in a very practical way, in workshops designed to give you as much time and support as possible in gaining lots of useful skills. As your course progresses you'll have opportunities to work on photographic projects with other student groups across the college as well as with classmates, gaining valuable experience for future study and work and most importantly a strong personal portfolio. You'll be encouraged to take part in national competitions and to showcase your work in exhibitions online or in gallery setups.
