

Subsea and Pipeline Engineering

University of Strathclyde

Content

As oil is required to be extracted in deeper and rougher seas, new demands continue to be imposed on design development as well as new installation and inspection techniques.

This course is for graduates in naval architecture, offshore engineering, mechanical engineering and related disciplines who want to gain advanced knowledge of subsea systems, designs and installation. This includes systems and equipment such as: pipelines, wellheads, drilling rigs, riser and mooring systems.

You can exit at the end of 9 months with a PgDip Subsea and Pipeline Engineering.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Faculty

Faculty of Engineering

Department

Naval Architecture, Ocean and Marine Engineering

Entry Requirements

For the MSc, a first or second class BEng Honours degree in a relevant subject.

Applicants with marginally lower qualifications will be considered for the Postgraduate Diploma in the first instance. Applicants with other qualifications will be considered on an individual basis.

SCQF Level

11

Address

16 Richmond Street
Glasgow
Glasgow City
G1 1XQ
