

Advanced Architectural Design (ARB and RIBA Part 2)

University of Strathclyde

Content

Year 1

This year is centred on consolidating your architectural design skills. You'll also be introduced to the idea of architecture as a responsive solution to fundamental social issues. You'll choose an area of personal interest that you'll research for your dissertation.

Year 2

You'll undertake an architectural project. This requires you to take a viewpoint on contemporary architectural issues and choose a theme that reflects your own interests and creative ambitions. As well as studio-based activities you'll follow your chosen theme through project work and optional classes. You'll also attend a taught course in professional studies and a series of guest lectures.

Study trips provide opportunities for intensive examinations of the culture and built fabric in a variety of urban and rural locations both in the UK and overseas. Recent trips include Barcelona, Rome, Paris and Venice and the less familiar Gdansk, Toledo and Monte Caruso.

You can exit at the end of 21 months with a PgDip.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MArch

Course Length

24 months

Faculty

Faculty of Engineering

Department

Architecture
