

Advanced Mechanical Engineering

University of Strathclyde

Content

Mechanical engineers are currently in demand in all types of industry. The MSc in Advanced Mechanical Engineering has been developed to provide high-calibre mechanical engineering graduates with an in-depth technical understanding of advanced mechanical topics, together with generic skills that will allow them to contribute effectively in developing company capabilities.

This course will help you to gain expert knowledge in advanced mechanical engineering topics. You'll also have the opportunity to take modules in general skills such as project management and risk analysis. These are necessary skills for any professional engineer.

Start Date

January, September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Faculty

Faculty of Engineering

Department

Mechanical and Aerospace Engineering

Entry Requirements

A first or upper second-class Honours degree in engineering or physical sciences, or equivalent professional qualification. A lower class degree may be considered with relevant work experience.

SCQF Level

11
