

Geography (Arts and Social Sciences)

University of Aberdeen

Venues

Old Aberdeen Campus

Content

Geography is key to understanding and resolving many of the most pressing problems faced by society, including climate change, poverty, energy transitions, sustainable development and environmental conservation. This degree programmes reflect these modern-day challenges, with core and optional courses aimed at producing highly skilled graduates who can think critically and develop solutions to tackle these problems.

In the First Year of your Geography degree, you will study two courses that provide an introduction to Geography in all its diversity. Both courses incorporate a workgroup programme alongside a lecture series covering aspects of Human and Physical Geography.

In Second Year and Third Year, you will begin specialising in the areas of Geography that most interest you or align with your career aspirations. In the Fourth Year, you will pursue an individual piece of geographical research in your Dissertation Project and choose courses that reflect the truly cutting-edge research strengths of Geography and Environment in Aberdeen.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

MA Hons
