

# Diagnostic Radiography

Robert Gordon University

## Content

As a Diagnostic Radiographer you will use sophisticated imaging technology and a range of specialist modalities including digital radiography, magnetic resonance imaging, computed tomography, radionuclide imaging and ultrasound. Your key role will be to provide high quality diagnostic images to aid in the detection, monitoring and management of the patient's illness.

Changes to the traditional methods of healthcare provision mean entry-level graduate Radiographers are increasingly involved in extended roles including image commenting, image interpretation, report writing, patient treatment and prescribing of medications. These emergent skills require high levels of analytical, problem-solving and research skills.

## Start Date

September

## Qualification

Degree

## Study Method

Full time

## Award Title

MDRad

## UCAS Code

B821

## Course Length

4 years

## Department

School of Health

## Entry Requirements

2026 entry requirements

Standard entry:

4 Highers at BBBC including English or another English based subject and two from Maths, Biology (or Human Biology),

Chemistry and Physics.

Widening access entry:

4 Highers at BCCC including English or another English based subject and two from Maths, Biology (or Human Biology), Chemistry and Physics.
