

Physiotherapy

Robert Gordon University

Content

Year 1:

You'll develop a foundation in anatomy and pathophysiology, normal structure, function, movement, exercise and behaviours. You'll learn the ethos of improving health and supporting behavioural change through working in partnership with individuals and groups. Students will develop assessment and treatment skills with the opportunity to consolidate these skills on clinical placement at the end of year 1.

Year 2:

You'll develop knowledge, analysis and evaluation of abnormal function and its impact upon movement and function as well as physical, psychological, and social aspects of rehabilitation. Skills in assessment, treatment, health promotion, research, team working, leadership and clinical reasoning will also be developed. Two placements will consolidate your learning.

Year 3:

You'll integrate academic and clinical areas to develop skills in managing complex long term conditions, treatment modifications using more independent study skills. You'll study effective and evidence based practice along with policy and its impact on physiotherapy practice. From the two clinical placements, one will be elective.

Year 4:

You'll further develop a critical approach to: practice, clinical reasoning and life-long learning; developing confidence, flexibility in approach and self-evaluation of your skills ensuring you attain clinical competency. You will work collaboratively and in partnership with other health professions students focusing on leadership, management and service evaluation.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

MPhys

UCAS Code

B160
