

Biochemistry

University of St Andrews

Content

The BSc (Hons) in Biochemistry entails the study of the biochemical mechanisms involved in all life processes covering a broad spectrum of fields, from viral replication to neurobiology. You will investigate the biochemical aspects of cell and organismal function, including protein structure and function, regulation, molecular genetics, membranes and cell communication, and pharmacology as well as a final-year laboratory project with one of the relevant research groups in the Biomedical Sciences Research Complex.

In the first two years of your degree, you will be introduced to core material relevant to all biology degree programmes such as animal and plant biology, molecular biology, cell biology and genetics.

In third year, there is a shift from core, broad-themed modules to more specialised modules that allow students to prepare for their Honours degree. In fourth year students continue specific research in their chosen area through student-led, inquiry-based learning.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

C700

Course Length

4 years

Faculty

Faculty of Science

Department

Biology

Entry Requirements

2027 entry requirements

Standard entry:

4 Highers at AAAB including Biology (or Human Biology) and one from Maths, Chemistry or Physics plus English at National 5 at B.

Widening access entry:

4 Highers at AABB including Biology (or Human Biology) and one from Maths, Chemistry or Physics plus English at National 5 at B. (You may gain entry to the Gateway programme with 4 Highers at BBBB).

Entry into second year is possible with Advanced Higher Biology and Maths, Chemistry or Physics at AB or BA plus Highers at AAAB.

SCQF Level

10
