

Neuroscience

University of St Andrews

Content

Neuroscience is the science of the nervous system and involves studying how the brain and the rest of the nervous system work in health and disease. Neuroscience is taught closely between the School of Biology and the School of Psychology and Neuroscience and emphasises understanding how the mind and brain work to facilitate our behaviour.

Students of Neuroscience at St Andrews receive a broad education ranging from the level of single proteins within the nervous system and the activity of individual nerve cells, up to higher brain functions such as memory formation and cognitive processing.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

B140

Course Length

4 years

Faculty

Faculty of Science

Department

Psychology and Neuroscience

Entry Requirements

2023 entry requirements

Standard entry:

4 Highers at AAAB including two from Maths, Biology (or Human Biology), Chemistry and Physics plus English at National 5 at B.

Widening access entry:

4 Highers at AABB including two from Maths, Biology (or Human Biology), Chemistry and Physics plus English at National 5 at B. (You may gain entry to the Gateway programme with 4 Highers at BBBB).

SCQF Level

10
