

## Biology with French

University of St Andrews

### Content

Biology involves the study of life at all levels, from the molecular biology of virus replication to the study of animals and plants in their natural habitats. Biology also touches on many aspects of contemporary life, from drug design and investigating the molecular basis of Alzheimer's disease, to the migration and conservation of marine mammals – all of which can be studied at St Andrews.

By studying French at St Andrews, you will be given direct access to French and francophone culture, history and values, and all the debate, contradictions and extraordinary creativity that characterise contemporary France and the French-speaking world. You will be offered a broad view of French and francophone literature, civilisation and culture, and will be able to shape your degree according to your specific interests.

French courses use communicative, integrated methods, allowing you to develop a high level of competency in language skills, alongside cultural awareness and other crucial transferable skills.

### Start Date

September

### Qualification

Degree

### Study Method

Full time

### Award Title

BSc Hons

### UCAS Code

CCR1

### Course Length

4 years

### Faculty

Faculty of Science

### Department

Biology

## Entry Requirements

2025 entry requirements

Standard entry:

4 Highers at AAAB including French at A; Biology (or Human Biology) and Maths, Chemistry or Physics plus English at National 5 at B.

Widening access entry:

4 Highers at AABB including French at A; Biology (or Human Biology) and Maths, Chemistry or Physics plus English at National 5 at B. (You may gain entry to the Gateway programme with 4 Highers at BBBB).

## SCQF Level

10
