Risk Management

Glasgow Caledonian University

Content

Become a Risk Manager if you enjoy analysing and making impactful decisions using specialist skills. Study the identification, assessment and reduction of threats to an organisation's success along with core business skills.

Risk is everywhere and we manage risk daily from travelling to work or school to ensuring that we have enough money to cover our outgoings. Businesses do the same.

As a global Risk Manager, you'll be a keen communicator, analytical, enjoy problem-solving and building relationships across the organisation. Put simply, a career in risk management involves general business management but specialises in risk.

Generally, roles and responsibilities involve working with an organisation's stakeholders to determine the potential opportunities and uncertainties facing businesses. A Risk Manager will evaluate these and develop suitable strategies to either reduce the uncertainties or enhance a business’s ability to capitalise on those risks.

If you are interested in any business subject, including operational and strategic management, public relations and media crises or business administration, this Risk Management degree offers you the ability to explore these issues from an industry-led perspective.

Start Date

September

Qualification

Degree
