

Interior Architecture and Design

West College Scotland

Venues

Paisley Campus

Content

The course develops your creativity and understanding of the design process through a series of integrated subjects. Design projects are developed from the research to concept stage, to sketch design, and finally to the completion of technical drawings ready for presentation to a client.

The course is predominantly studio-based with a combination of group work, site visits, lectures, practical demonstrations and tutorial.

Creating a portfolio of your work; Working with live clients; How the interiors of building are used and experienced; Design processes; How to develop a project from research and concept development to presenting to a client; Sketch design; Technical drawings; Model making; CAD; Perspective drawing and rendering; Exhibition design; 3D computer modelling and simulated walk-through virtual environments.
