Paisley Campus

Content

On this course you will learn the full design process, including: mind-maps, research, thumbnails, roughs and final solutions. You will do this through sketchbook development and digital design, whilst finding creative solutions to given briefs. You will also get the chance to learn, develop and work with a great design team with many years teaching and industry experience who are multi-award winning.

You'll also work on a broad range of live graphic design projects based on real client briefs.

You'll learn about:

Creating a portfolio of your work; Working with live clients; How the interiors of building are used and experienced; Design processes; How to develop a project from research and concept development to presenting to a client; Sketch design; Technical drawings; Model making; CAD; Perspective drawing and rendering; Exhibition design; 3D computer modelling and simulated walk-through virtual environments.
