Content

If you're looking for a career in the world of finance and love mathematical challenges, then a BSc in Financial Mathematics is the degree for you. Just as civil engineering deals with the design, construction and maintenance of buildings and roads, financial mathematics is concerned with the design, construction, and maintenance of financial products. Careers in financial mathematics offer some of the best salaries of all professions, and graduates working in this area thrive on being presented with interesting challenges on a day-to-day basis.

The Financial Mathematics programme develops the skills and knowledge required by the modern investment and asset management industry, where structured finance and relative value trading strategies dominate. The emphasis is on developing a range of practical skills relevant to the increasingly mathematical and ever-evolving world of contemporary finance.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

GGC3

Course Length

4 years

Faculty

School of Mathematical and Computer Sciences

Department

Actuarial Mathematics and Statistics

Entry Requirements

2026 entry requirements

Standard entry: 4 Highers at AAAB including Maths at A plus English at National 5.

Widening access entry: 4 Highers at ABBC including Maths at A plus English at National 5.

For entry to Level 2 you would require 3 Advanced Highers at AAB including Maths at A plus Highers at AAAB.

SCQF Level

9/10
