

Mathematics

Open University in Scotland

Content

Mathematics shapes our world – from algorithms that power social media to the sat nav in our cars. With our accredited mathematics degree, you'll gain the skills and expertise to solve real-world challenges from the everyday to the complex. This course will expand your knowledge of pure and applied mathematics, with the option to study statistics, physics, maths education and more. You'll develop the problem-solving, logical reasoning and analytical skills of a mathematician – abilities highly valued in careers from business to banking and data science to teaching.

Start Date

October, February

Qualification

Degree

Study Method

Online learning

Award Title

BSc Hons

Course Length

Flexible

Faculty

General

Department

Mathematics and Statistics

Entry Requirements

There are no formal entry requirements to study this qualification, but it is very important that you are well prepared to study mathematics at this level.

Computer and internet access required.

SCQF Level

SCQF Points

«SCQFPoints»

Progression Routes

You'll be equipped with skills and knowledge required for jobs in fields such as education, engineering, business, finance, and accountancy.

You may need to undertake further training or study in order to enter a new career area.
