

Photography (Level 6)

West College Scotland

Venues

Clydebank Campus
Paisley Campus

Content

The course is designed to build your technical and creative confidence as a photographer. You will learn how to use a DSLR camera (supplied if required) and take pictures of a very wide range of subjects.

The course is fun and very social – you will be working with other like-minded people. It blends technical and creative approaches – you are sure to find what aspects of photography you excel at really quickly during the course.

This course is part of a suite of Creative Industry qualifications, where along with learning focussed Media skills listed above, you will also develop a range of entrepreneurial skills, helping you to become more employable across all sectors of the Creative Industries.

You will also have the opportunity to take part in our flexible NC provision should you wish, where you can choose a mix of any modules from the range of Creative Industries NC courses we run at both Clydebank and Greenock campuses and create a course unique to you and your interests, building your own timetable along the way.

Start Date

August

Qualification

NQ

Study Method

Full time
