

Useful Links

Here is a range of links where you can find more information on getting into the offshore energy sector, some organisations that offer apprenticeships and graduate programmes and inspiring resources for use in the classroom.

Career and industry information

[Neon Futures](#) - information on careers in engineering, including activities and experiences to take part in.

[Royal Society of Chemistry](#) - information on careers in chemistry including people profiles.

[Institute of Physics](#) - information on careers in physics including people profiles.

[My Energy Future](#) - find out about the range of careers available in the energy sector.

[OEUK](#) - see facts and figures and find out more about the offshore industry.

[Institute of Marine Science, Engineering and Technology](#) - find out about different marine careers, including offshore oil, gas and renewables.

[The Geological Society](#) - information on the range of careers and pathways.

Information on apprenticeship and graduate programmes

[BP](#) - offer apprenticeships and graduate programmes.

[APTUS/OGTAP](#) - information on the Energy Technician Apprenticeship Programme.

[EnQuest](#) - offer graduate programmes in engineering and business support areas.

[Equinor](#) - offer apprenticeship and graduate programmes.

[Serica Energy](#) - offer the Energy Technician Apprenticeship Programme.

[AISUS](#) - offer offshore field engineering apprenticeships.

[MDL](#) - offer apprenticeship and graduate programmes.

[ABL Group](#) - offer an Engineering Graduate Programme for graduates from a range of disciplines.

[James Fisher](#) - offer apprenticeships in hydraulic engineering and business support functions.

[Three60Energy](#) - offer graduate engineering positions.

[STATS Group](#) - offer apprenticeship and graduate programmes.

Resources for schools

[Energy 4 Me \(Society of Petroleum Engineers\)](#) - lesson plans, classroom materials and other resources relating to energy.

[Royal Academy of Engineering](#) - resources on engineering topics for use in the classroom.

[Our Future Energy](#) - energy related resources for teachers.

[STEM Learning](#) - search for energy related information and resources to support STEM education.

[The Geological Society](#) - teaching resources and activities.
