

Pest Control Technician

Pest control technicians get rid of pests that are a danger to health or that damage crops or food.

They deal with insects such as fleas, lice, wasps, cockroaches and beetles. They also deal with animals and birds such as mice, rats, grey squirrels, moles, pigeons and seagulls.

The Work

You could be:

- visiting homes, shops, offices, factories, warehouses, farms and other places to identify and control pests
- using a gun, trap, poison or insecticide to kill pests
- using non-poisonous methods to kill pests in places where food is manufactured, packed or sold
- looking for evidence of pests, working out the extent of the problem and deciding how to treat it
- arranging evacuation if necessary, spraying the premises (fumigation), laying traps and checking them
- collecting samples of droppings, skin castings, live or dead animals or damaged food products, for scientific analysis
- proofing areas to prevent pests returning: building screens, sealing holes, putting fine mesh over air vents or spikes on a building to stop pigeons landing
- keeping records of inspections and treatments done and giving advice to stop further infestations.
- keeping up with new innovations in electrical pest control technology.

Pay

The figures below are only a guide. Actual pay rates may vary, depending on:

- where you work
- the size of company or organisation you work for
- the demand for the job.

Salaries for pest control technicians vary, but tend to be in the region of £16,500 to £25,000 a year. With experience you could earn more.

Some companies offer bonuses, use of a company vehicle and uniform.

Conditions

- You have to travel to jobs, often in a company van or car.
- You will often work alone, but sometimes under supervision.
- You may be outdoors in all weathers or working in cold, dirty conditions, at heights or in confined spaces.
- The work can be unpleasant.
- You might have to carry heavy equipment.
- You will use some poisonous chemicals and sprays.
- You could be bitten by an animal or insect.

- You will wear protective clothing, sometimes including a mask, goggles and gloves.
- Working hours are usually regular, but you might have to work evenings or weekends, and you may need to be on call on a standby rota.

Getting In

- Most employers will usually ask for subjects at National 4 or 5 including English and Maths.
- You usually need a full driving licence.
- You need basic IT skills.
- You should be fit enough to carry out physical work.
- You should not be allergic to animals or insects, or to the chemicals used.

Jobs are with local authorities or pest control companies.

What Does It Take

You need to be:

- able to work in dirty and unpleasant conditions and not be squeamish
- able to climb ladders and enter lofts and restricted spaces
- responsible and able to follow health and safety regulations
- practical and good with your hands – for operating equipment
- confident when handling wild animals and insects
- accurate and able to keep records and write reports
- observant with an eye for detail
- tactful and able to get on well with people of all backgrounds
- able to prioritise your workload.

Training

- Training is usually on the job.
- The main entry level qualifications are the Royal Society for Public Health (RSPH) Level 2 Award in Pest Management or a Pest Management qualification from the British Pest Control Association (BPCA). These courses can be studied online, or through a residential course.
- The National Pest Technicians Association runs short courses including flying insects control and working safely at heights.

Getting On

- With experience, you could become a surveyor in pest control, doing both technical and sales work.
- Those wishing to progress in the industry should complete the RSPH Level 3 Diploma in Pest Management.
- The British Pest Control Association (BPCA) offer the Advanced Technician in Pest Management qualification for those who are involved in the handling of pesticides or other pest control practices. You must already have the RSPH or BPCA Level 2 Award in Pest Management.
- You could become a supervisor or manager.
- You might set up your own business.
