

Orthodontist

Orthodontics is a specialised branch of dentistry concerned with the growing jaw, teeth and face. Orthodontists treat their patients, mostly children and teenagers, by straightening irregular teeth and other problems associated with the developing jaws, usually by fitting either fixed or removable braces to teeth.

The Work

You could be:

- examining the patient's mouth and teeth, taking photographs or x-rays
- taking impressions of the teeth using a specially mixed mould
- deciding whether to fit fixed braces, removable braces, or a combination of the two
- if necessary, extracting teeth or carrying out other jaw surgery
- if necessary, injecting the gums with a local anaesthetic
- telling the patient how to care for the teeth and the braces
- checking up regularly on progress and making any necessary adjustments
- if self-employed, running the business and doing accounts.

Pay

For a qualified orthodontist, the salary can begin at around £45,000 a year. Experienced NHS consultants can earn up to £100,000 a year or more. In a private practice the income will depend on the number of patients and the hours worked.

Conditions

- You might work in a hospital, a specialist practice, or in a community dental service clinic.
- In a practice, hours are normal but there may be out of hours on call duty.
- You would wear a white coat or other protective clothing.

Getting In

- You must first qualify as a dentist. (See job profile [Dentist](#).)
- After qualifying as a dentist you must register with the [General Dental Council \(GDC\)](#), to allow you to practise as a dentist in the UK.
- You then need to work at least 2 years of postgraduate clinical experience before applying for a course in orthodontics.
- You should try to gain a broad experience in the different areas of dentistry during your vocational or general practitioner training.
- The University of Edinburgh offers the MClinDent postgraduate course in Orthodontics. You would do the course as part of the orthodontic training programme.
- You will require a satisfactory criminal record check from Disclosure Scotland to show that you are suitable for this type of work. Contact [Disclosure Scotland](#) for details on the type you would need.
- You must undergo screening for blood borne diseases such as Hepatitis B and C or HIV.

- You need good eyesight.

What Does It Take

You should be:

- practical and good with your hands
- able to communicate with children and young people
- accurate and willing to pay attention to detail
- a logical and analytical thinker
- confident in making decisions based on specialist knowledge.

Training

- The orthodontic training programme takes three years, involving both academic study at university and clinical training in a hospital setting.
- You would then sit the Membership in Orthodontics examination (MOrth) to become a specialist in orthodontics.
- Throughout your career you must keep your skills and knowledge up to date through Continuous Professional Development (CPD).

Getting On

- You could run your own business by running a specialised practice.
- You could take a specialist post in a community hospitals service.
- With further training and qualifications you could go on to become a hospital consultant.
- You could teach orthodontics at a university.

More Information

The University of Dundee offers a unique three day Dental Insight programme running every June. To be eligible for a place you must be an S5 secondary school pupil studying in Scotland, and be on track to achieve the minimum entrance requirements to study dentistry at the University of Dundee.

Dental students in Scotland can apply for the Dental Student Support Grant (DSSG). This provides £4,000 each year for those whose annual household income is less than £34,000 a year. They must commit to working in NHS Dentistry in Scotland after graduation. Full information is available on the www.mygov.scot website.
