

## National 5 Mathematics (Course Code: C847 75)

SCQF Level 5 (24 Credit Points)

### Why study Mathematics?

Mathematics is important in everyday life, allowing us to make sense of the world around us and to manage our lives. Using mathematics enables us to model real-life situations and make connections and informed predictions. It equips us with the skills we need to interpret and analyse information, simplify and solve problems, assess risk and make informed decisions.

You will also get to develop skills in the areas of algebra, geometry and trigonometry as well as learn elementary calculus.

The skills you learn in this course are useful in many careers involving engineering, medicine, technology, business and the physical sciences.

#### Career Pathways

To see what career areas this subject could lead to and the routes to get there, download and view these career pathways:

[Animals, Land and Environment](#)

[Buying, Selling and Related Work](#)

[Computing and ICT](#)

[Engineering](#)

[Finance](#)

[Health and Medicine](#)

[Science and Maths](#)

[Teaching and Classroom Support](#)

[Transport and Distribution](#)

### What do I need to get in?

The school or college will decide on the entry requirements for the course. You would normally have achieved:

- **National 4 Mathematics**

### What will I study?

In this course you will build on your previous mathematical experience. You will learn and apply operational skills you need to develop mathematical ideas through symbolic representation and diagrams. You will select and apply mathematical techniques, and learn about the interdependencies within mathematics. You will develop your mathematical reasoning and problem solving skills. And you will get experienced in making informed decisions.

The course comprises **three** areas of study.

### **Mathematics: Expressions and Formulae**

You will:

- develop skills linked to mathematical expressions and formulae, such as manipulating abstract terms, simplifying expressions and evaluating formulae
- learn aspects of number, algebra, geometry and reasoning.

### **Mathematics: Relationships**

You will:

- develop skills linked to mathematical relationships, including solving and manipulating equations, working with graphs and carrying out calculations on the lengths and angles of shapes
- learn aspects of algebra, geometry, trigonometry and reasoning.

### **Mathematics: Applications**

You will:

- develop skills linked to applications of mathematics, including trigonometry, geometry, number processes and statistics within real life contexts
- learn aspects of trigonometry, geometry, number processes, statistics and reasoning.

## **How will I be assessed?**

### **Course Assessment**

The course assessment has **two** components **totalling 110 marks**:

- Component 1: question paper 1 (non-calculator) – worth 50 marks
- Component 2: question paper 2 – worth 60 marks.

The question papers will be set and marked externally by the Scottish Qualifications Authority (SQA).

The grade awarded is based on the total marks achieved across all course assessment components.

The course assessment is graded A-D.

## Study Materials

- [SQA Past Papers Mathematics National 5](#)
- [SQA Specimen Paper Mathematics National 5 \(paper 1 – non-calculator\)](#)
- [SQA Specimen Paper Mathematics National 5 \(paper 2\)](#)
- [SQA Understanding Standards Mathematics](#)
- [BBC Bitesize National 5 Mathematics](#)

## What can I go on to next?

If you complete the course successfully, it may lead to:

- **Higher Mathematics**

Further study, training or employment in:

- Computing and ICT
- Construction
- Engineering
- Finance
- Mathematics and Statistics
- Science and Mathematics
- Teaching and Classroom Support
- Transport and Distribution
